

# The First and Still the Best Wireless Headset

## Six Reasons to Choose the **GN 9120**

**1**

### Conference calls without the conference room

Up to four people, wearing a GN 9120, can make a call using the 9120's multi-unit conferencing capability. Simply place another GN 9120 headset into the base and press a button on your headset. And because the GN 9120 has a range of up to 300-feet, you can talk from virtually anywhere in the office once you are connected.

Conference calls are now mobile, clear and completely secure. Quite simply, there's no other conference call like it. The only thing you give up is the conference room and the shouting. By purchasing GN 9120 accessory headsets, you can economically utilize the conferencing feature without purchasing additional systems.

**2**

### Unbeatable 300' range

The fully wireless GN 9120 gives you the freedom to think on your feet without cutting you off from your phone. Move up to 300-feet away from your desk without losing touch, and discover how far the GN 9120 will take you. Don't limit your freedom or efficiency in the office!

While other companies may claim their products offer a 300-foot range, real-world testing proves otherwise. But, don't just take our word for it. Check out the GN 9120's unbeatable range and talk time for yourself – you won't be disappointed!

**3**

### Unrivaled density - deploy up to 50 systems

Could your entire office benefit from the GN 9120? Utilizing Digital FHSS (Frequency Hopping Spread Spectrum) and Smart Power Management, multiple GN 9120 systems can be used in a single location, without sacrifice to audio performance or range. At up to 50 systems per facility, the GN 9120 offers more than twice the density of other products available today.

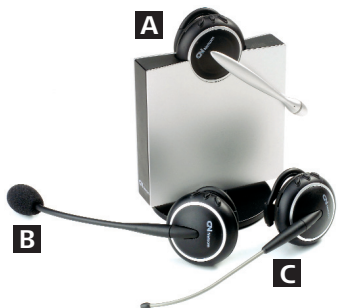

**4**

### Unsurpassed comfort and convenience

Only the GN 9120 gives you a choice of 3 different boom arms and microphone styles to suit your style and office environment needs. Complete comfort and customization are yours with the GN 9120.

No matter which boom style you choose or which kind of office you work in, the GN 9120 is the most comfortable headset – with the best sound quality.

The GN 9120 also comes with interchangeable wearing styles (over-the-head or over-the-ear) that are perfect for every user.

#### A. Midi boom

Unobtrusive and compact.  
Great in private or quiet office environments.

#### B. Flex boom

Flexible and personal.  
Great for open, loud office environments.

#### C. Micro boom

Discreet and sleek.  
Great for typical open office environments.

5

### Widespread compatibility

Take the guesswork out of telephone compatibility. Get the GN 9120, which works with virtually all desk phones. The GN 9120 has 8 compatibility settings, double that of other products available today.

Do you want to gamble with anything less than ultimate compatibility?

6

### Quick answer

Even adding remote handset lifting capability won't slow you down. Simply lift the headset from the base for immediate and automatic activation of the handset lifter (GN 1000 RHL). You can't do that with any other wireless unit.
