

How To GPO Install the Connect Client

Source: Mitel Articles // Mar, 19 - 2019

This article expects the network administrator has functional knowledge of Active Directory and Group Policy Objects. Further investigation and assistance with these Microsoft components should be handled by Microsoft Support. Please contact Mitel TAC for any concerns regarding the Mitel Connect Client portion of this article.

This article outlines the process using a Server 2012 Operating System.

1. Obtain the correct build of the Mitel Connect client which includes the required .msi file.

	Name	Date modified	Туре	Size
	Connect	11/29/2016 11:53	File folder	
ds	ST_Connect_Client_213.100.1559.0.zip	11/3/2016 10:11 AM	Compressed (zipp	492,606 KB
ices				

2. Make note of the required prerequisites as seen below and only select the ones applicable to your system.

🔀 Mitel

3. Make note of the path to the .msi file used for a GPO push of the software.

📬 Network	🗊 ShoreTel Connect.msi	9/9/2016 2:08 PM	M Windows Installer	2,711 KB

4. Create a network share that includes access to both the .msi and the prerequisites folder.

 In Group Policy Management create a new Group Policy Object by right clicking Group Policy Object then selecting "New"

Connect Install				

6. Edit the newly created Group Policy Object by right clicking it and choosing "Edit". Within Group Policy Management Editor configure the Software Settings under Computer

Configuration. From here you will right click Software Installation to add a new

Package.

8. You have the option to create a unique organizational unit to control which PCs have this software installed. The example below includes an OU named "Desktops" which the GPO is linked to by right clicking the created OU then selecting "Link an Existing GPO". Can you customer this to your environment's needs.
